IMMUNOLOGY OF PARASITIC INFECTIONS

Edited by S. COHEN M.D. PH.D. F.R.C.PATH., Professor of Chemical Pathology, Guy's Hospital Medical School, London; and the late E. H. SADUN PH.D., formerly Head, Department of Medical Zoology, Walter Reed Army Institute of Research, Washington, D.C.

1976. 524 pages, 50 illustrations. £15.50

In many tropical and subtropical countries parasitic infections exact a toll of human life and health grave enough to constitute a serious threat to economic and social development. This book has been designed to promote a greater understanding between parasitologists and immunologists in the hope that these problems can eventually be overcome.

CLINICAL TROPICAL DERMATOLOGY

Edited by O. CANIZARES M.D. F.A.C.P., Professor of Clinical Dermatology, New York College of Medicine.

1975. 496 pages, 272 illustrations (40 colour). £20.00

'Seventeen dermatologists of international repute, mostly from the American continent, contribute to this volume, and they cover tropical dermatology thoroughly . . . English-speaking physicians the world over are privileged to have such clear, concise, and up-to-date information.' *The Lancet*

Contents Dermatoses due to fungi; Dermatoses due to viruses; Treponematoses; Dermatoses due to bacteria; Dermatoses due to animals; Dermatoses due to malnutrition; Exogenous and endogenous eczemas, lichen simplex and prurigo in the tropics; Venereal diseases; Cutaneous manifestations of systemic tropical diseases; Miscellaneous dermatoses in the tropics; Tropical topographic differential diagnosis; Appendices.

LECTURE NOTES ON GENERAL SURGERY: Tropical Supplement

D. ROY M.B. F.R.C.S., Professor of Surgery, The Queen's University of Belfast.

1975. 82 pages, 5 illustrations. Paper, £2.75

This book is designed to be read in conjunction with *Lecture Notes on General Surgery*. It covers the practice of surgery in tropical countries where students are required to know more of the management of disease than their colleagues for whom the parent volume was written.

Contents General considerations in the surgical patient in the tropics; Infections due to bacteria; Infections due to protozoa and helminths; Infections by fungi; Animal and reptile bites and injuries; Malignant tumours; Respiratory system; Circulation and lymphatic systems; Central and peripheral nervous system; Upper alimentary tract; Lower intestinal tract and peritoneal cavity; Hernia; Liver, gall bladder, pancreas and spleen; Genitourinary systems; Endocrine glands; Breast, skin and its adnexae.

Adams and Maegraith's CLINICAL TROPICAL DISEASES

B. G. MAEGRAITH, from the Liverpool School of Tropical Medicine.

Sixth Edition, 1976. 596 pages, 74 illustrations. £10.50

Although this well-known book was originally written for doctors working in the tropics, the increase in international travel and immigration makes it of practical importance in the temperate world.

Contents Amoebiasis; Anaemias; Bacillary dysentery; Bartonellosis; Brucellosis; Cholera; Filariasis; Fungal infections; Haemoglobinopathies; Heat and light; Hookworm infection; Leishmaniasis; Leprosy; Leptospirosis; Lymphopathia venereum; Malaria; Miscellaneous disorders; Nutritional disorders; Plague; Rabies; Rat-bite fevers; Relapsing fevers; Schistosomiasis; Skin conditions; Smallpox; Snake bite; Sprue; Toxoplasmosis; Trachoma; Tropical ulcer; Trypanosomiasis; Typhoid fevers; Typhus fevers; Virus fevers; Worm infections; Yaws.

Adams and Maegraith's TROPICAL MEDICINE FOR NURSES

B. G. MAEGRAITH and H. M. GILLES, from the Liverpool School of Tropical Medicine.

Fourth Edition, 1975. 320 pages, 54 illustrations. £6.75

This well-known book needs no introduction as it is established throughout the world as an authoritative text on disease and curative medicine for nurses in training and working in the tropics. There is little doubt that the changes and additions to this new edition will ensure that it is as widely welcomed as its predecessors.

Contents Amoebiasis; Anaemias in the tropics; Bacillary dysentery; Brucellosis; Cholera; Filariases; Fungal infections; Guinea worm infection; Effects of exposure to heat; Hookworm infection; Leishmaniasis; Leprosy; Leptospirosis; Lymphogranuloma venereum; Malaria; Miscellaneous disorders; Nutritional disorders; Plague; Rabies; Relapsing fevers; Schistosomiasis; Sickled cell haemoglobin; Some skin conditions; Smallpox; Snake bite, spider bite and venomous stings; Sprue; Trachoma; Tropical ulcer; Trypanosomiasis; Typhoid fevers; Typhus fevers; Virus fevers; Worm infections; Yaws.
